

Library Vision Grant Guidelines Tribal College Library General 2025

Libraries provide essential services to communities by providing access to information, fostering literacy, and supporting lifelong learning and personal enrichment. The North Dakota State Library and the North Dakota Library Coordinating Council grant program aims to strengthen libraries of all types by supporting the development of essential services and programs and increasing access to valuable collections. By funding creative and impactful projects, we seek to strengthen the role of libraries as vital community hubs.

Grant applications should indicate the purpose of the project, the dollars required to complete the project, the impact that the project will have on the community, and a clear evaluation plan with measurable goals. The project must be aligned with a Library Vision goal and the application must clearly articulate how and why the project aligns with the specific goal selected. Aligning with the correct Library Vision goal is a high priority for the Council. If the Council determines that the project and goal are not in alignment the grant will not be funded. Please review the [Library Vision Strategic Plan](#) for more information on the goals.
