Introduction

This publication, 1990 Census at a Glance, was prepared in order to make census data more readily available to users. It is hoped that by combining those tables most often used into one publication, valuable time usually spent searching through the various census volumes would be eliminated. Also, some of the tables consist of social indicators derived from census data, thus saving the user calculation time. The tables are also intended to educate the public about the types and uses of census data and perhaps to arouse an interest in seeking more detailed information.

Included in this publication are two affirmative action tables (Appendices One and Two). These tables provide occupational data by sex and race (Appendix One), and labor force data by sex and race (Appendix Two). The last section of the publication (Appendix Three) presents city population from the 1940 to the 1990 census reports. The list contains both incorporated and non-incorporated cities. Included in this list are those cities that have not existed for a very long time. Part of the reason for inclusion is to emphasize the changing demographic pattern of declining population in small, rural communities and the expansion of larger urban communities.

Obviously, not all of the census data available were used in this publication. However, if there are tables that the reader feels warrant inclusion because of user needs, please contact Warren Boyd at (701) 224-3048. Census information continues to arrive and later editions could incorporate new series.

Census data can be obtained from other sources in North Dakota. The state has a census data center, located at NDSU, as well as several affiliates. A complete listing of these sites is provided in Appendix Four.

All the tables within the publication provide the information by county and statewide. The data in some tables can be provided for smaller geographical areas. Inquiries should be directed to the nearest state data center.

It is hoped that this volume will become a valuable tool for users, and any suggestions to improve its usefulness are welcome.

Population by Race by County

| | Total | White | Black | Native American | Asian | Other | Hispanic* |
